ENVIRONMENTAL PROTECTION AGENCY MEMORANDUM

DATE: June 24, 2015
TO: DLPC Division Files
FROM: Kendall Couch, DLPC/FOS - Collinsville Region
SUBJECT: LPC# 1630755017-St. Clair County
Marissa/Cottonwood Hills Landfill
FOS

RECEIVED
JUL 08 2015
IEPA/BOL

General Remarks

On May 28, 2015, I went to Marissa, Illinois to investigate complaints of landfill odors allegedly emanating from the Cottonwood Hills Landfill. The weather was sunny, wet and 75° Fahrenheit.

Complaint Summary

On May 11, 2015, a complaint was received at the USEPA. This complaint alleged erosion, discolored landfill run-off and Waste Water Treatment Plant overloading. Thirty-one more complaints were submitted via the Illinois Environmental Protection Act (IEPA) Internet Citizen Pollution Complaint system on May 12, 2015 and one other on May 13, 2015. The complaints were submitted by two complainants. These two complainants have submitted numerous similar complaints over the last four years. The complaints focus on landfill odors causing decreased home value and health effects.

On May 13, 2015, I spoke with Denny Dennison, Waste Management's Environmental Engineer via phone. I explained the complaint. Mr. Dennison had no abnormal operations to report. Mr. Dennison went on to say, Weaver Boos would be conducting routine quarterly air monitoring around the landfill and Marissa city limits. I requested flare records for the timeframe when the complainant's were experiencing the odor problems.

Later in the day, I received an email from Mr. Dennison explaining flare operations and future submission of gas flare data. Mr. Dennison spoke with the gas well technician for Waste Management, Mike McElvain. Mr. McElvain had no abnormalities to report as well. Mr. Dennison also attached over 400 pages of gas flare data from April 2015. A review of this data did not reveal any abnormalities in the flare operations. Another email received on May 14, 2015 from Mr. Dennison, reported gas flare data for the complaint timeframe. This data indicates the gas flare was working properly.

IEPA - DIVISION OF RECORDS MANAGEMENT
RELEASABLE

AUG 04 2015

REVIEWER EAV

On May 18, 2015, air monitoring results from Weaver Boos was received via email. This monitoring event did not reveal any indication of landfill odors leaving the landfill property. Two elevated readings of 6.48ppb and 4.36ppb of hydrogen sulfide gas were recorded at an area just northeast of the active face of the landfill. Hydrogen sulfide gas concentrations in the range of 5ppb are not out of the ordinary due to the close proximity to the open face and the wind coming from the southern direction.

Investigational Finding

When I arrived at 11:00am, I met with Bill Raynor-Cottonwood Hills Landfill Certified Operator, Kevin Frate-Cottonwood Hills Landfill Certified Operator, Mr. McElvain and Mr. Dennison.

We had a discussion of the operations at the landfill around the May 12th timeframe. No abnormal operations were reported during this discussion. The flare was operating properly. During outages of the flare, the auto shut-off valve will close preventing any landfill gas venting. There is also a system notifying landfill personnel of flare outages. Mr. McElvain stated the gas well system was working well. It should be noted, new gas wells installed in 2014 will only enhance the removal of the landfill gas generated at this site.

The issue of landfill odors leaving the Cottonwood Hills Landfill property, could not be substantiated during this investigation.

Subject: FW: Cottonwood landfill
Chris and Mike,

I believe Cottonwood Hills is working on final cover around the landfill. Erosion is sometimes problematic if doing this final cover work during rainy periods, like we have had recently. Erosion will be remediated as the project moves forward.

The group of stones is most likely a water let-down that is critical to the structural integrity of the landfill. Sounds like its doing its job.

Waste Water Treatment Plants can get overloaded and is common for waste, that is not completely treated, to be discharged to prevent complete Plant failure.

Subject: Cottonwood landfill

Hi Jeff,

I got a complaint from [REDACTED] about Cottonwood landfill. [REDACTED] observed the following today at Cottonwood:

- (1) Erosion can be seen from Hwy 13
- (2) They facility built a group of stones on the east side of the landfill and water is running from the interior of the landfill over these rocks and down the mountain of the landfill. It is a discolored liquid.
- (3) The waste water treatment system in Marissa is overloaded due to the rain and untreated waste and landfill leachate is going to the Doza Creek.

I'm not sure if any of these are violations but I'm forwarding them to you to check out. Thanks Jeff.

Subject: Cottonwood Hills Gas Information
Attachments: CAA Gas Flare Flowmeter Data April 2015 - Cottonwood.pdf

I spoke with our Gas Tech Mike McElvain and the flare and collection system are operating properly ... he is currently in the field at Milam "tuning" the wellfield (ie adjusting vacuum and taking readings on methane, pressure, temperature, and oxygen at each well as required monthly at the landfills) ... he is going to try and run down to Cottonwood to pull the flare card tomorrow or Friday and then I can send you detailed data (continuous monitor and records data every 2 minutes) for yesterday and today ... we typically download the data at the end of each month

I have attached April 2015 for Cottonwood as an example ... the left columns are temperature (shows flare burning) and the right columns are landfill gas flow combusted at the flare ...

Please note there were 3 days when the flare ran but the flowmeter didn't record data due to a utility trip which tripped the flowmeter breaker to prevent damage to the flowmeter

| | | | | | | |
|-----------|---------|-----------|-------|----------|---|---------------------------------|
| | | | 11:18 | | | Utility Power Outage - flare al |
| 4/25/2015 | 4:58 PM | 4/28/2015 | AM | 66:20:36 | 3 | tripped |

If you look at the temperature data columns, if the flare is not running the temperature will drop dramatically to near ambient air temperature within a few minutes (see April 6 at around 23:00 when flare went down for less than an hour and then auto restarted) ... the restarts can be caused by severe storms, utility power outages, etc and do not occur very often ... if the flare doesn't auto-restart the gas tech is called by the autodialer at the flare and he will go out and perform any necessary adjustments and restart the flare ... please note there is an auto-shutoff valve that closes if the flare goes down so that gas is not allowed to vent

I believe Michael Gates was referring to when the USEPA was out last summer on July 29, 2014 as he emailed me requesting the date they were out last summer ... I requested an inspection report last summer from USEPA and they said they typically don't send reports out and I never received a report

Subject: Odor Complaints

Denny,

We received some complaints on odors coming from Cottonwood Hills. The complaints alleged odors occurring all day yesterday. Have you had any abnormal operations of gas sytem problems over the last several days.

Also, Mike Gates told Chris that USEPA was out doing some air monitoring. If so, can we get a copy of the results?

Thanks,

Kendall Couch

Kendall ... please find attached the flare flowmeter data for the past several days ... the flare ran continuously and combusted 1300+ cubic feet of gas per minute ... thanks

Re: Results of March 2015 Air Monitoring
Marissa, Illinois

Dear Mr. Cahnovsky:

Weaver Consultants Group North Central, LLC (Weaver Consultants) completed another round of air monitoring during the 2nd quarter 2015 in Marissa, Illinois. A drawing indicating the sampling locations, a table of previous air monitoring results and the additional air monitoring results are attached to this letter.

Please contact me at (630) 717-4848 if you have any questions or need clarification.

Sincerely,

Weaver Consultants Group North Central, LLC

| South West Perimeter Road | SP18 | 0 ppb | 3.05 ppb | 0 ppb | 0 ppb | 0 ppb | 0 ppb | 0 ppb | 0 ppb | |

Notes:

- NM = not monitored.
- 1. Landfill Southwest Perimeter Road (SP17) and Landfill Southwest Perimeter Road (SP18) added to sampling program on 12/17/2013.
- 2. First round of sampling including all locations and then reduced to landfill locations. Off site sampling locations added back to program in January 2014.
- 3. Lack of accessibility due to muddy conditions.

Below is the result of your feedback form. It was submitted by [REDACTED] on Tuesday, May 12, 2015 at 20:23:57

street-address [REDACTED]

city: [REDACTED]

county: [REDACTED]

state: [REDACTED]

zip-code: [REDACTED]

home-phone [REDACTED]

cell-phone [REDACTED]

resp-owner-company: waste management

resp-address: cottonwood hills landfill

resp-city: Marissa

resp-county: St. Clair

complaint-nature: air

problem-description: North West wind made my home unable to be occupied. Smell causes instant headaches and difficulty breathing.

problem-timetable: Today most of day.

health-issues: yes

doctor-consulted: yes

property-damage: yes

property-damage-description: Value of home that smells and makes people sick is worthless. EPA Illinois accepts fake and wrongful calibrated air test with money to allow air pollution to continue.
